

# Dermalescence<sup>®</sup> Skincare

Published quarterly by Chelsea Dermatology. This Fall 2009 edition can be viewed online at [www.chelseaderm.com](http://www.chelseaderm.com)

MAINTAINING HEALTHY ATTRACTIVE SKIN CAN HELP GIVE YOU CONFIDENCE NEEDED TO SUCCEED AT WORK AND AT PLAY.

## Addressing Your Fall & Holiday Skin Needs In Tough Economic Times

**H**aving healthy attractive skin can be one of your most valuable and visible assets when in the public eye. As well, self-esteem and self-assuredness can be helped when you are pleased with your skin's appearance. We at Chelsea Dermatology and DermalEssence<sup>®</sup> are here to assist you in meeting your goals but understand that you are results oriented and may have budgetary concerns.

With this in mind, our Fall and Holiday special offerings are treatments, services and skincare products which consistently provide results and therefore value. Although we do not provide direct financing at Chelsea Dermatology, CareCredit<sup>®</sup> is a company we partner with to provide financing for medical treatments. Through November 30th CareCredit<sup>®</sup> has a promotional 0% interest free rate on balances for up to twelve months. Patients can call 866 247 3049 to find out additional details. We encourage all clients to be financially prudent however for the right circumstances, patients on a budget may find such financing helps them get the procedure they

want now and extend payments over time.

Treatments performed by Dr. Hatcher that require several months to see optimal results and because of both sun-avoidance and some social downtime are ideally performed starting during the Fall. However,

other treatments such as Botox<sup>®</sup> for frown lines and Fillers for wrinkles performed by Dr. Hatcher and Microdermabrasion performed by our aesthetician produce quick noticeable results that are perfect for this social season.

### SKIN RESURFACING

**P**earl and Pearl Fractional rejuvenation treatments are procedures that resurface the skin and can be done in skin types no darker

## DERMALESSENCE<sup>®</sup> SPAFOCUS

For the Fall and Holiday we are offering the following:

### ➔ PUMPKIN REJUVENATION FACIAL SERIES OF SIX FACIALS

**\$600** PLUS TAX

This treatment gradually removed the dead outer layer of skin cell that appear dull and retain unwanted pigment. Stimulates thickening of the live outer skin layers. Anti-oxidant help reverse and prevent aging due to sun-damage.

### ➔ MICRODERMABRASION SERIES OF THREE

**\$300** PLUS TAX

Lifts off outer most dead skin layer and stimulates superficial collagen production thereby decreasing fine lines. Great as single procedure for smoother looking skin before social event. Helps makeup apply more evenly.

### ➔ BETA LIFT PEEL SERIES OF THREE

**\$300** PLUS TAX

This salicylic acid containing peel gently exfoliates dead skin cells on the surface and within the oil pore which can block oil secretion and lead to acne. Helps to remove unwanted pigment discolorations. Great for acne-prone skin.

➔ **High Line Express Facial Coupon**  
**\$75.00 plus tax**  
 30-minute cleansing and detoxifying facial for women and men all ages  
 \*One introductory treatment with this coupon for new spa clients only before 12/31/09.

# Addressing Your Fall & Holiday Skin Needs CONTINUED

than olive skin tone. These treatments can correct fine lines, enlarged pores, remove brown pigment, deep wrinkles around the eyes/mouth, and repair deep acne or other scars. These procedures have five to seven days of social downtime.

## LIPOSCULPTURE

Removal of unwanted accumulations of fat on the thighs, abdomen and neck using local anesthesia to perform tumescent liposculpture with three to four days of downtime. Liposculpture is performed as a come and go procedure with the patient conscious but comfortable.

## LEG VEINS TREATMENT

Unightly thigh, calf and ankle veins can be removed by a series of treatments using an injectable solution (sclerotherapy) alone or in combination with laser energy which targets the especially small blood vessels. Because there can be bruising and patients need to wear compression stocking, the patient will want the leg covered with pants for a week to ten days. Ideally leg vein treatment requires three to four treatment sessions and the Fall and Winter months are best.

## FILLERS FOR FOLDS, WRINKLE LINES, AND VOLUME LOSS

Correction of lines and folds involving the face by the use of Fillers can help restore a more youthful appearance. In the case of Restylane®, Juvederm®

and Cosmoplast®/Cosmoderm® the effect is immediate and ideally suited for those patients having social events in the near future. The Fillers can be also used to restore loss of volume in the cheeks and around the eyes and temples. The results last less than a year in most cases. As with any injection procedure, bruising is a possible side effect along with swelling and redness that can last for four days. Lip augmentation swelling and bruising may last for seven days. Sculptra® was recently approved for cosmetic use and gradually stimulates your own skin to make more collagen. The treatments are done four to eight weeks apart and in most cases a total of three treatments are required. Maximum improvement is seen six to eight months after the first treatment is begun and can last

more than two years. It can be used for subtle aging and lines or for severe loss of facial volume. Some have likened it to a "liquid face lift".

## LIMELIGHT TREATMENT FOR BROWN AND RED SPOTS

Limelight is an intense pulse light treatment designed to remove red or brown spots from facial and body areas over several treatments. Such spots are usually due to sun-damage resulting in sun freckles and spider veins. Expect pinkness

the day of the treatment and darkening of the brown spots for several days during which time the spots gently peel away. Microdermabrasion is sometimes used before the treatment to enhance the effectiveness of the Limelight treatment.
